

LPES INTERNATIONAL

Protection to Perfection

Advanced lightning, surge, earthing and grounding solutions for mission-critical infrastructure.

Built around global standards, engineering rigor and application-specific protection across industrial, commercial and transportation environments.

Engineering-led protection for critical infrastructure

A concise view of LPES International's footprint, promise and market coverage.

LPES International combines certified products, advanced technology and expert engineering to protect industries, buildings and critical facilities. The company positions itself as a complete-solution provider guided by the vision "Protection to Perfection."

456+

Projects deployed

30+

Experienced professionals

157+

Clients across country

Market segments served

— Industries

— Commercial

— Logistics &

— Transportation

India corporate office: Spaze IT Park Tower A, 916 & 917, Gurugram, Haryana

HQ: 1119 Budapest, Csurgoi ut 22-32A, 37 Hungary, Europe

Value proposition

Certified solutions

Global standards

Application-specific engineering

Business continuity focus

SOLUTIONS PORTFOLIO

Four shields. One mission.

LPES structures its offer around integrated protection layers that reduce downtime, asset damage and operational risk.

Lightning Protection & Earthing

Systems that safely direct lightning strikes and fault current into ground, improving electrical stability and compliance.

Power Protection & Engineering

High-performance SPDs engineered for 10/350 μ s and 8/20 μ s impulses for reliable surge control.

Environmental & Asset Protection

Measures that lower fire, hazard and system-failure exposure while supporting resilient operations.

Surge & Transient Protection

Low-resistance earthing and premium electrotechnical components for safe rapid dissipation.

Strategic narrative: LPES positions protection as an integrated stack—lightning capture, surge control, grounding integrity and asset continuity—rather than standalone product sales.

WHY LPES

Standards-driven execution and certified product logic

The website emphasizes compliance-backed engineering, custom grounding systems and durable field performance.

Compliance anchors

IEC 62305
NFPA 780
IEEE 80
IS 3043
UL-listed
components

Why clients choose

LPES

- Global expertise in lightning & surge protection
- Proven record of safety and compliance
- Certified electrotechnical equipment
- Custom industrial earthing and grounding systems

CALL TO ACTION

Protection-first partner for resilient infrastructure

The website closes with a consultative offer: free lightning risk assessment and direct expert engagement.

Understand your risk—at no cost

LPES offers a free, detailed lightning risk assessment for infrastructure. That positions the brand not just as a supplier, but as an engineering advisor in the early decision cycle.
